Motor-Free Rodent Caging Systems

Superior Technology

Blockparty®

Innovation

Service

Value

Increase cage space without buying more cages! Blockparty® allows up to ten Optimice® cages to connect to each other by use of horizontal connecting tunnels. Using the tunnel system, cage space can increase to any desired size and configuration and mice are then free to move about between cages.

Simply plug in the Blockparty® tunnel to connect any two cages:

- Plan experiments based on desired group size
- Manage different breeding schemes
- Add additional enrichment or test equipment in adjoining cages
- Carry out preference testing without modifying existing cage set-ups
- Cage change without disturbing or transferring mice/pups

Improve the
productivity
of your lab
